

Work Environment Policy

Areco Sweden AB is a company within Areco group, whose core business consists primary of the manufacture and distribution of products in thin sheeting for the European construction market.

A good and safe working environment, which includes both physical and social factors, is an important prerequisite for us to remain attractive and competitive on the market.

Our employees should be well informed about the company objectives and focuses so that we together can create, maintain and continually improve the working environment.

Our goals are:

- that work environmental issues should be an integral and natural part of the company's operations.
- that work environmental aspects are taken into account in the daily work.
- to innovate, always examine and assess the risks that may affect our work environment.
- that no employees are exposed to offensive or discriminatory measures or actions.
- to have procedures for inspection, maintenance and ongoing supervision of our production lines, equipments and transports.
- to develop good working practices and ensure that facilities exist that facilitate the daily work.
- to ensure that all environmental aspects are considered when purchasing machinery, equipments and other new materials.
- to implement safety-checks each quarter.
- to **evaluate** by annual monitoring how the new environmental processes are working.
